Home Page & model assignment

StudentProfile model in the existing pages application. The Home Page reads saved records from the database.

Page: http://127.0.0.1:8000/ Admin: http://127.0.0.1:8000/admin/

Field name	Django data type	Reason for the choice
full_name	CharField(max_length=150)	A name is short text with a practical maximum length.
university_id	CharField(max_length=20, unique=True)	An identifier is text, even when it contains only digits. Text preserves leading zeros; uniqueness prevents duplicate IDs.
age	PositiveSmallIntegerField	Age is a small whole number. Validators restrict it to 1-120 years.
date_of_birth	DateField	Stores a calendar date without an unnecessary time. Model validation rejects future dates.
address	TextField	An address can contain several lines and vary in length.
salary	DecimalField(max_digits=10, decimal_places=2)	Stores monetary amounts with two decimal places, avoiding floating-point rounding. Salary must be nonnegative.
photo	ImageField(upload_to="profiles/")	Accepts image uploads. The database stores the file path; the image file is stored in media/profiles/. Pillow provides image validation.

01 / Database migrations

The migration creates the pages_studentprofile table. The output below was recorded when the commands ran.

```
.\project\venv\Scripts\python.exe project\manage.py makemigrations pages
.\project\venv\Scripts\python.exe project\manage.py migrate
.\project\venv\Scripts\python.exe project\manage.py showmigrations pages
```

Migration output

```
Operations to perform:
  Apply all migrations: admin, auth, contenttypes, pages, sessions
Running migrations:
  Applying contenttypes.0001_initial... OK
  Applying auth.0001_initial... OK
  Applying admin.0001_initial... OK
  Applying admin.0002_logentry_remove_auto_add... OK
  Applying admin.0003_logentry_add_action_flag_choices... OK
  Applying contenttypes.0002_remove_content_type_name... OK
  Applying auth.0002_alter_permission_name_max_length... OK
  Applying auth.0003_alter_user_email_max_length... OK
  Applying auth.0004_alter_user_username_opts... OK
  Applying auth.0005_alter_user_last_login_null... OK
  Applying auth.0006_require_contenttypes_0002... OK
  Applying auth.0007_alter_validators_add_error_messages... OK
  Applying auth.0008_alter_user_username_max_length... OK
  Applying auth.0009_alter_user_last_name_max_length... OK
  Applying auth.0010_alter_group_name_max_length... OK
  Applying auth.0011_update_proxy_permissions... OK
  Applying auth.0012_alter_user_first_name_max_length... OK
  Applying pages.0001_initial... OK
  Applying sessions.0001_initial... OK
```

Model migration

0001_initial.py
Create model StudentProfile

Applied status

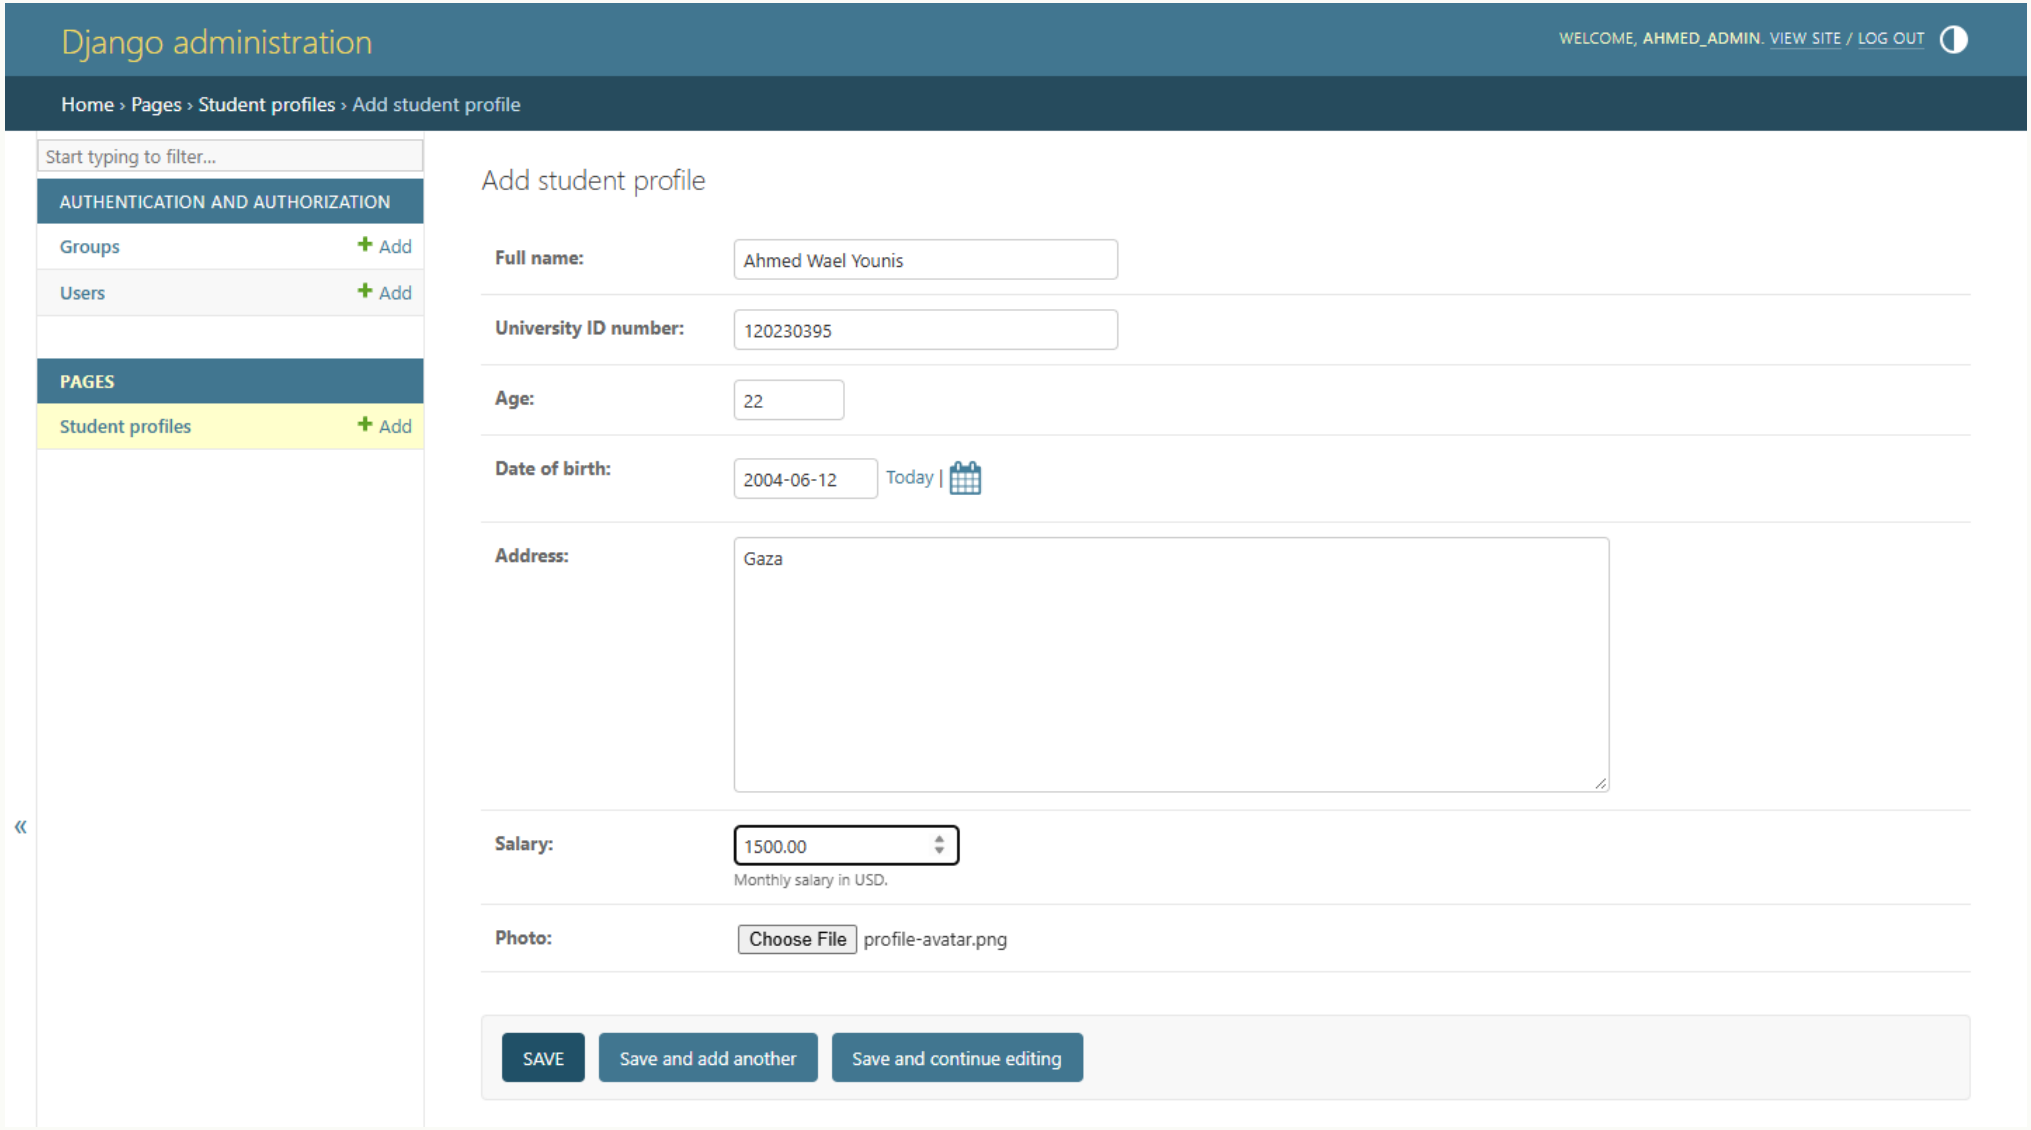

pages
[X] 0001_initial

The [X] confirms that pages.0001_initial has been applied. The original command logs are included in docs/evidence/.

Verification
Django system check: no issues.
Six tests passed.
No pending model changes.

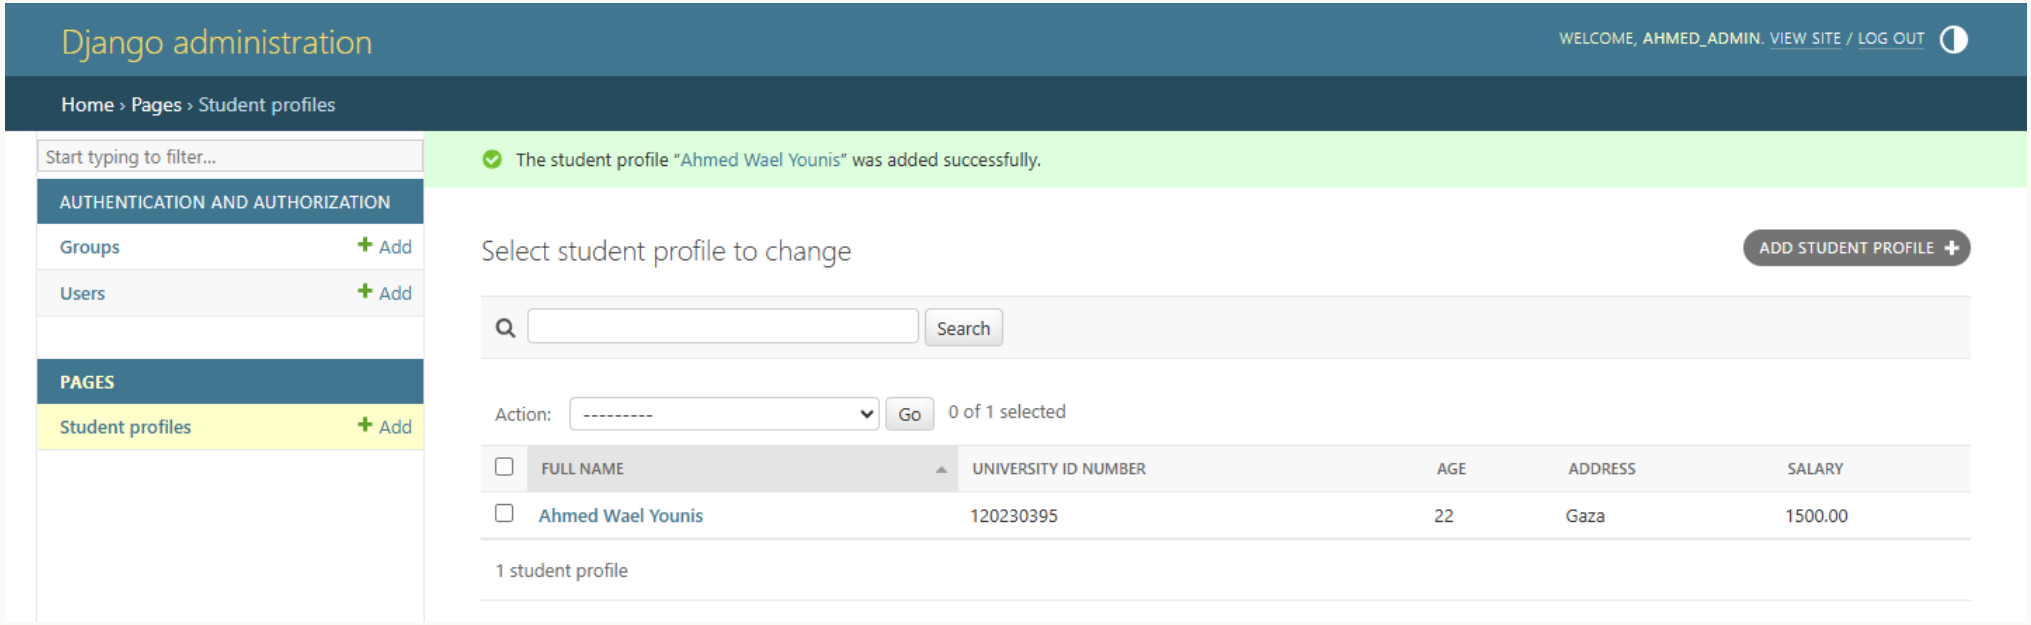

02 / Enter values in admin

Admin > Pages > Student profiles > Add student profile. All seven fields are completed, including the image upload.

03 / Saved student record

Selecting Save creates the record. The confirmation and the row below show that the admin submission succeeded.

Field	Entered value	Field	Entered value
Full name	Ahmed Wael Younis	Age	22
University ID	120230395	Date of birth	12 June 2004
Address	Gaza	Monthly salary	USD 1,500.00
Photo	profile-avatar.png	Stored photo path	profiles/profile-avatar.png

The salary is a sample value. The uploaded image is an illustrated avatar. Age 22 is the entered age on 28 October 2026.

04 / Home Page

http://127.0.0.1:8000/ | The saved database record and uploaded image appear in the page template.
